

The background of the page features pencil sketches of a bicycle and a scooter on a road. The bicycle is at the top, and the scooter is in the middle. The road is drawn with simple lines. The word 'LEWES' is written vertically in the top right corner.

# OUR BIG ASK

## A CYCLE AND SCOOTER SAFE LEWES

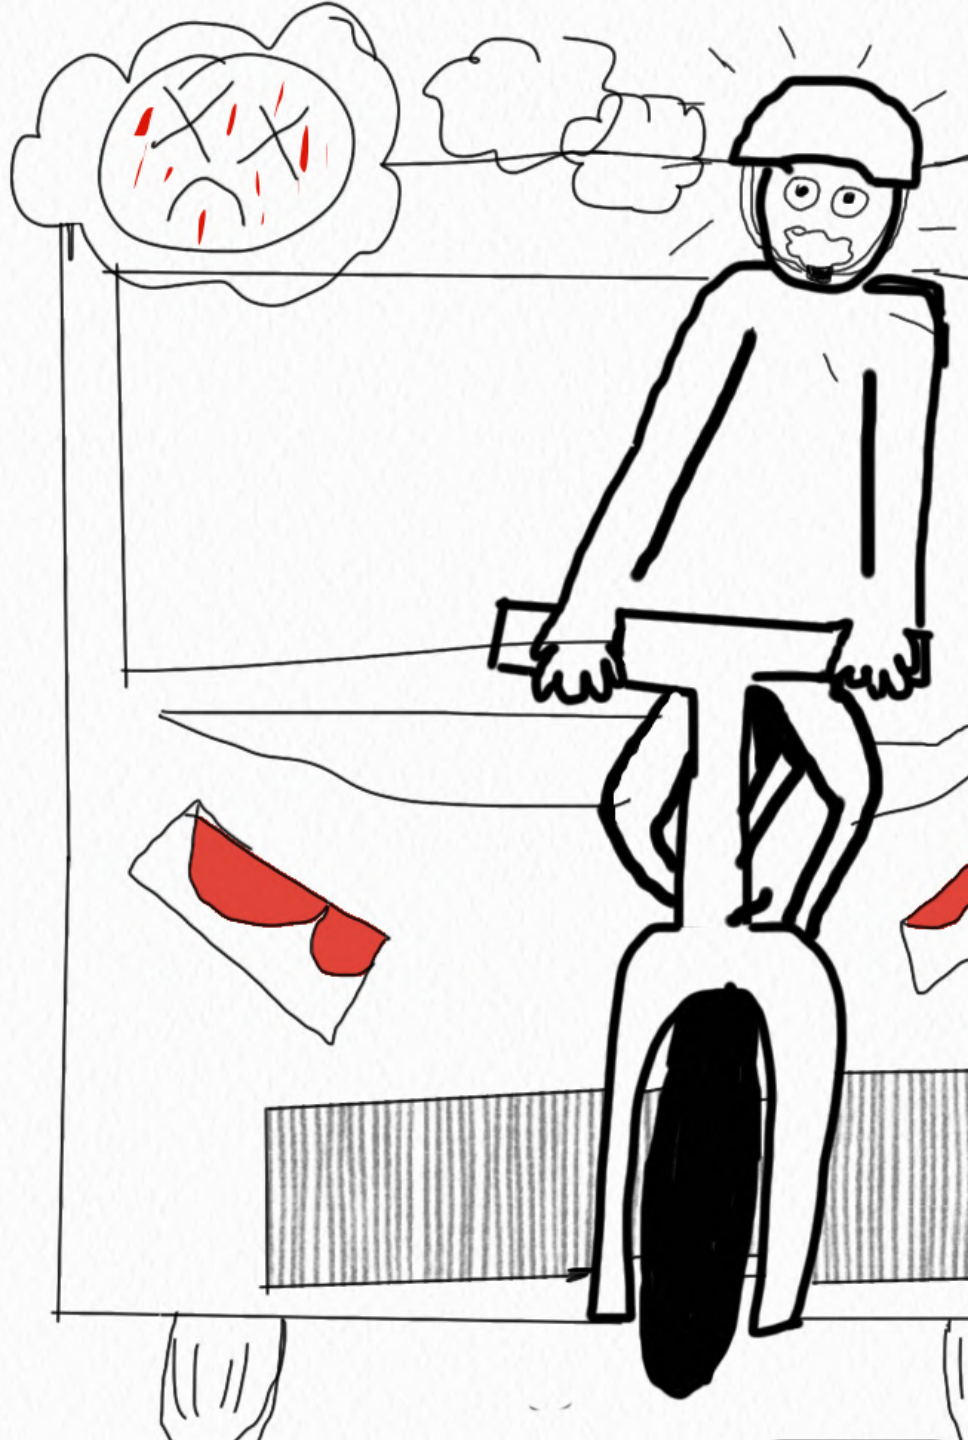

By Tom France and Thomas McKay  
May 2021

## **Our concern**

There are too many polluting cars on the road.

Especially at school drop-off and pick-up.

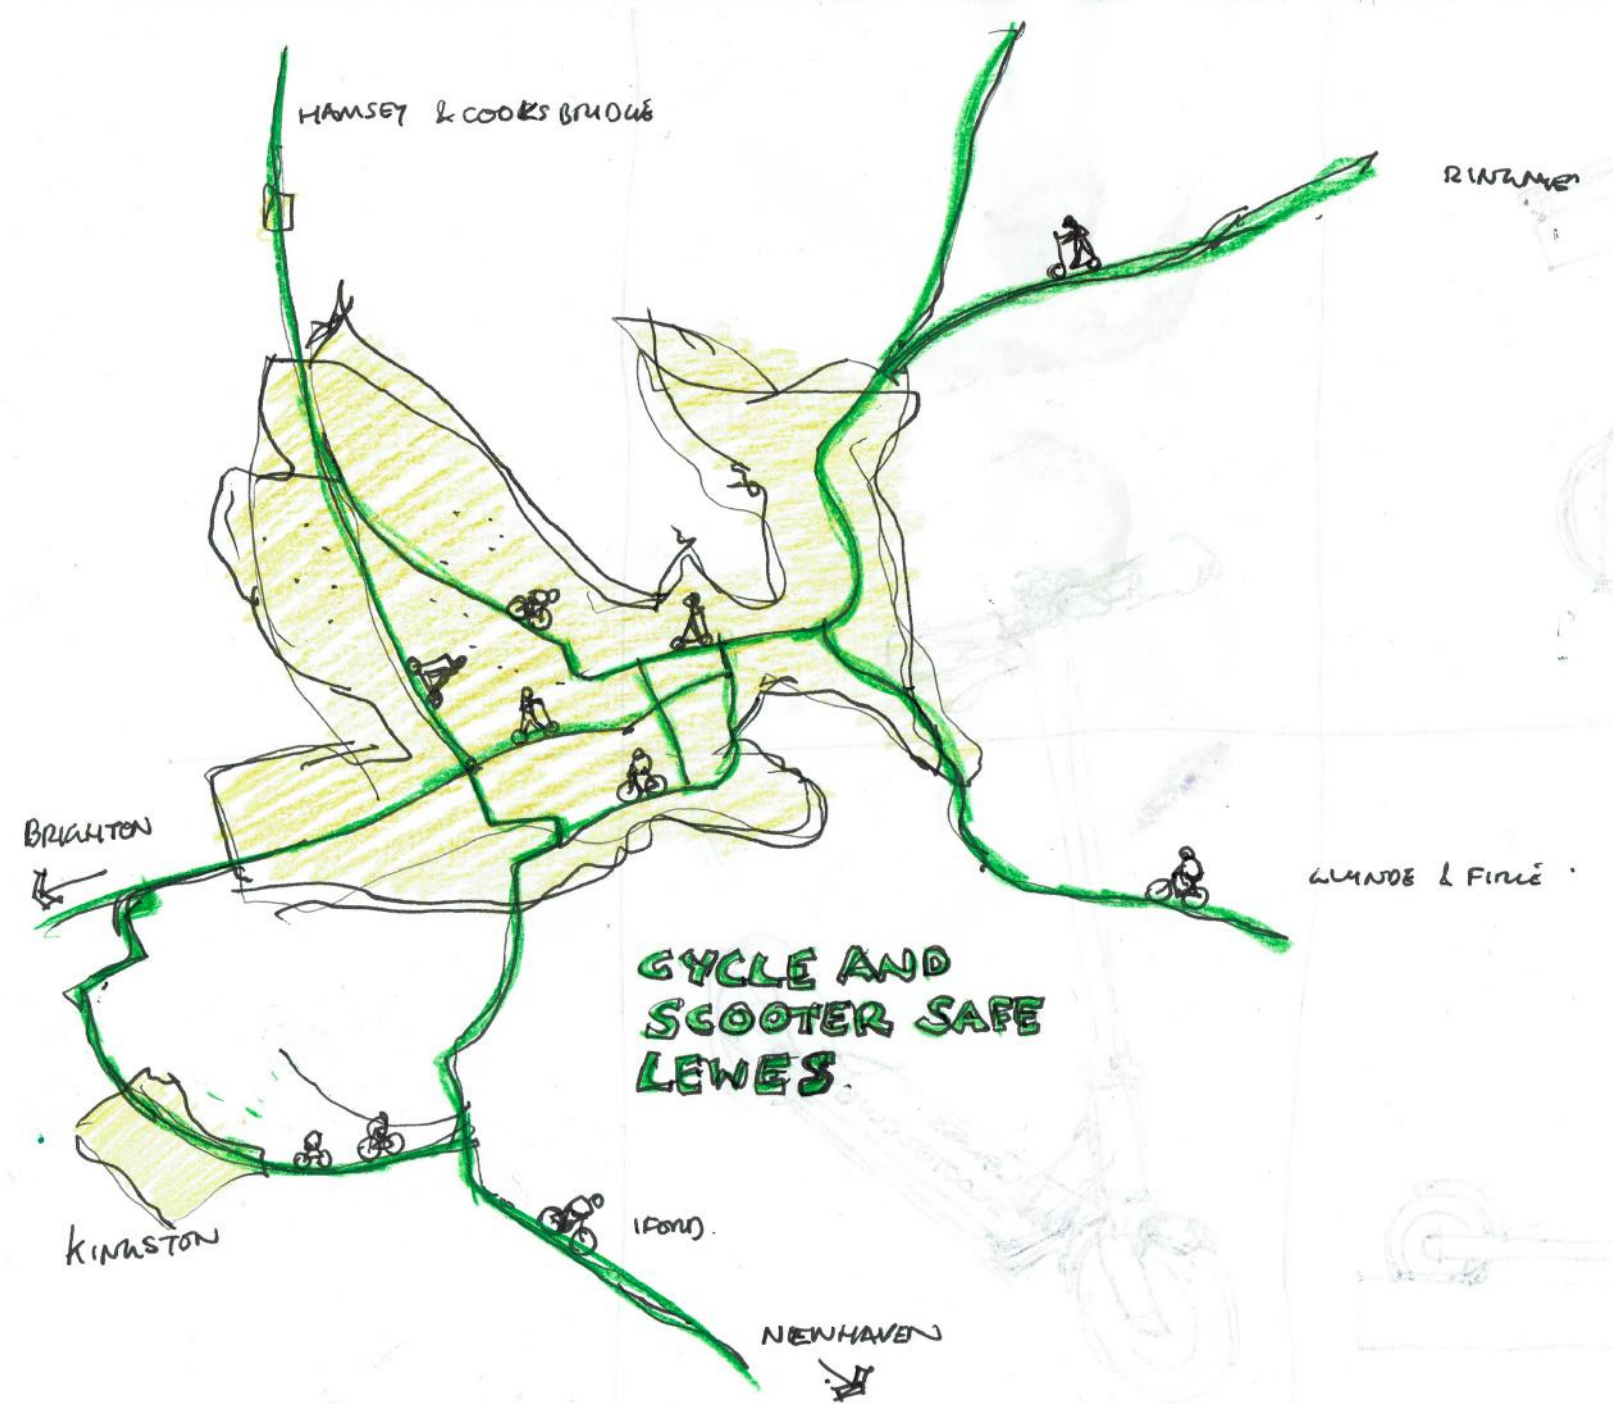

## **Our concern**

For many people on bikes, sharing the roads with vehicles is scary...so they don't cycle!

**Ahhhhh!**

## Our big idea

Let's make Lewes super safe for cycling and scooting.

**Yeah!**

# Our big idea

Less people in cars...way more people walking, cycling and scooting to school even from far away!

...and we can encourage this by creating electric charging shelters at schools.

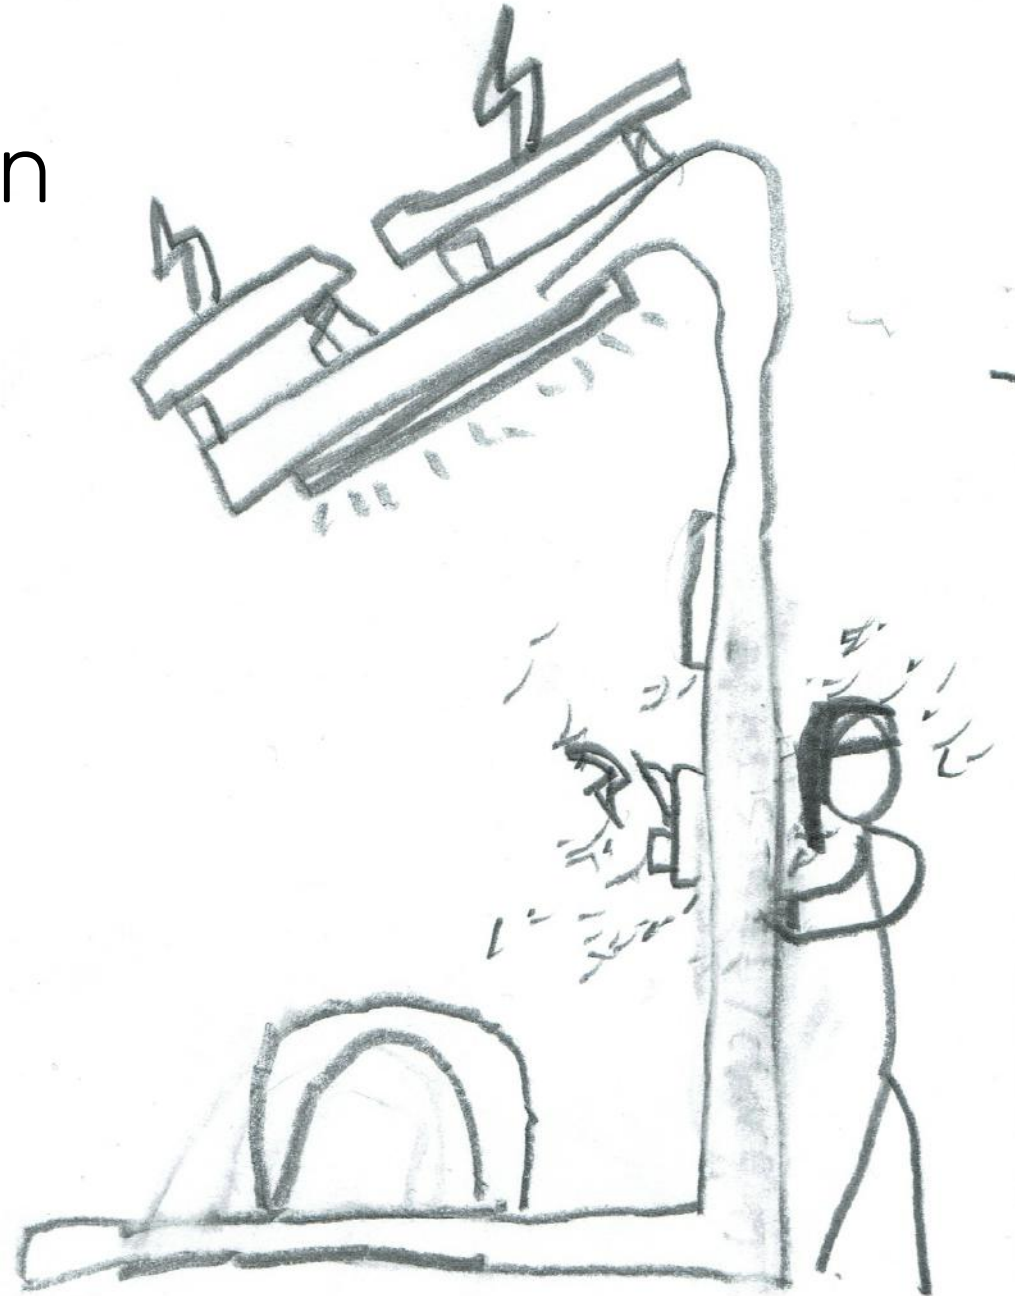

## Our big ask

We need people who can design and construct the cycle and scooter charging shelters.

Hopefully us school kids can help with the build.

The electricity would come straight from the roofs.

## **Our big ask**

We need energy companies to donate solar panels for free, and in return, they can use the shelters for free advertising!

So, win – win!
